

Eutectic Packs (2.20kg Capacity)

**Model:
2.20kg**

2.20kg

The perfect choice for the exclusive phase changed material application.

The most effective and worthy alternatives comes together with environmental safe, aging tolerance and much more saving in a long term.

It was designed and produced using the highest quality material and components to provide the user with most suitable product temperatures, lowest utility costs, exceptional food safety and the best value in today's chilled and frozen service marketplace.

High capacity, factory balanced refrigeration system that maintains desired temperature for the best in food preservation, vending and transportation system.

It is equipped with the best combination of the special additives and brine solution which provides the long lasting temperature holding.

The main casing (box) is also equipped with the cap which was connected to the box using Ultrasonic Welding Machine ensuring the premium quality of sealing. Worry-free about leakage.
